

V-Finder is an online video sharing application whose target customer is person who enjoy watching videos online. Other than the simple video uploading, video downloading and video watching functions, this application also includes comments, search and simple social function.

Logger:
The main function of this app.

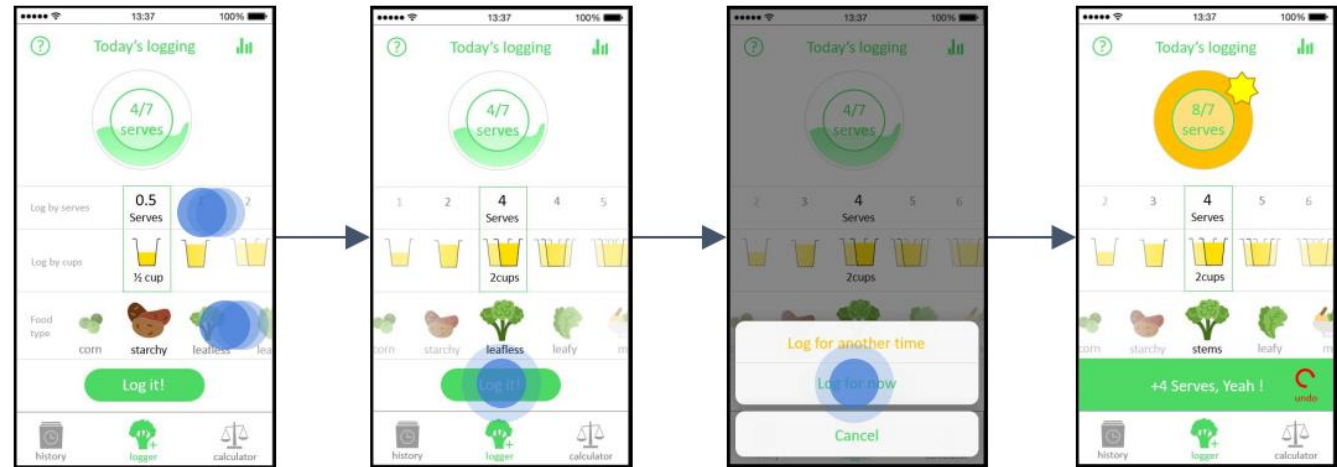

History:
Where users check and edit their logging records.

Calculator:
Allow the user to calculate vegetable serves and estimate their daily intake.

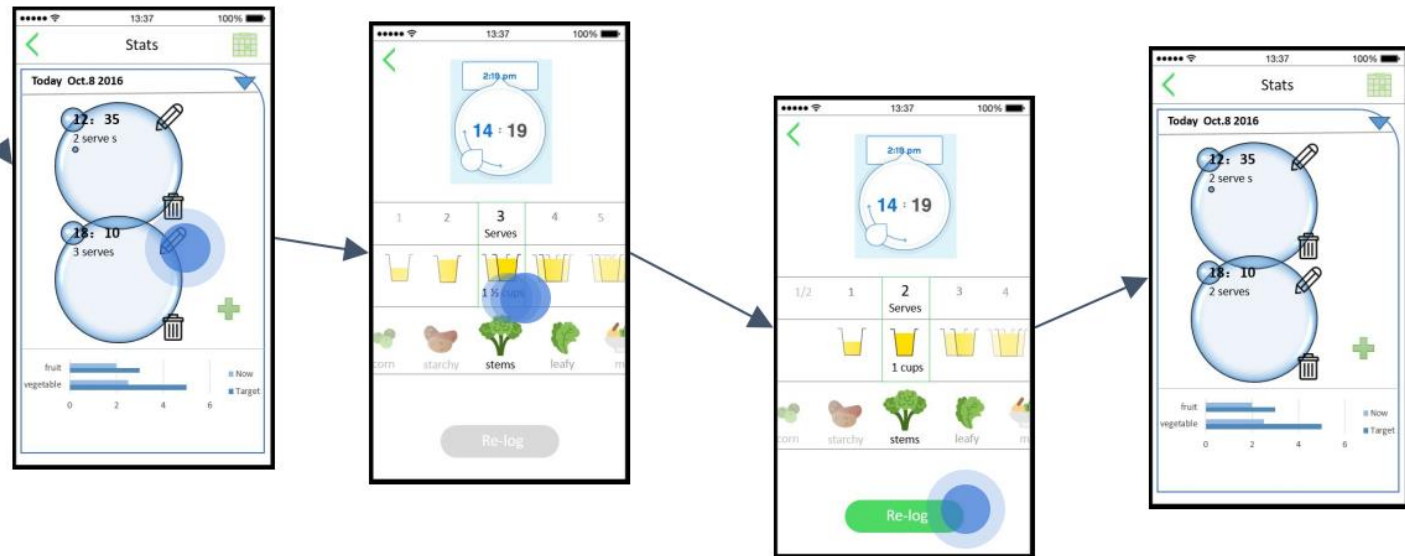

Settings:
Users can change their personal details and the settings of the app.

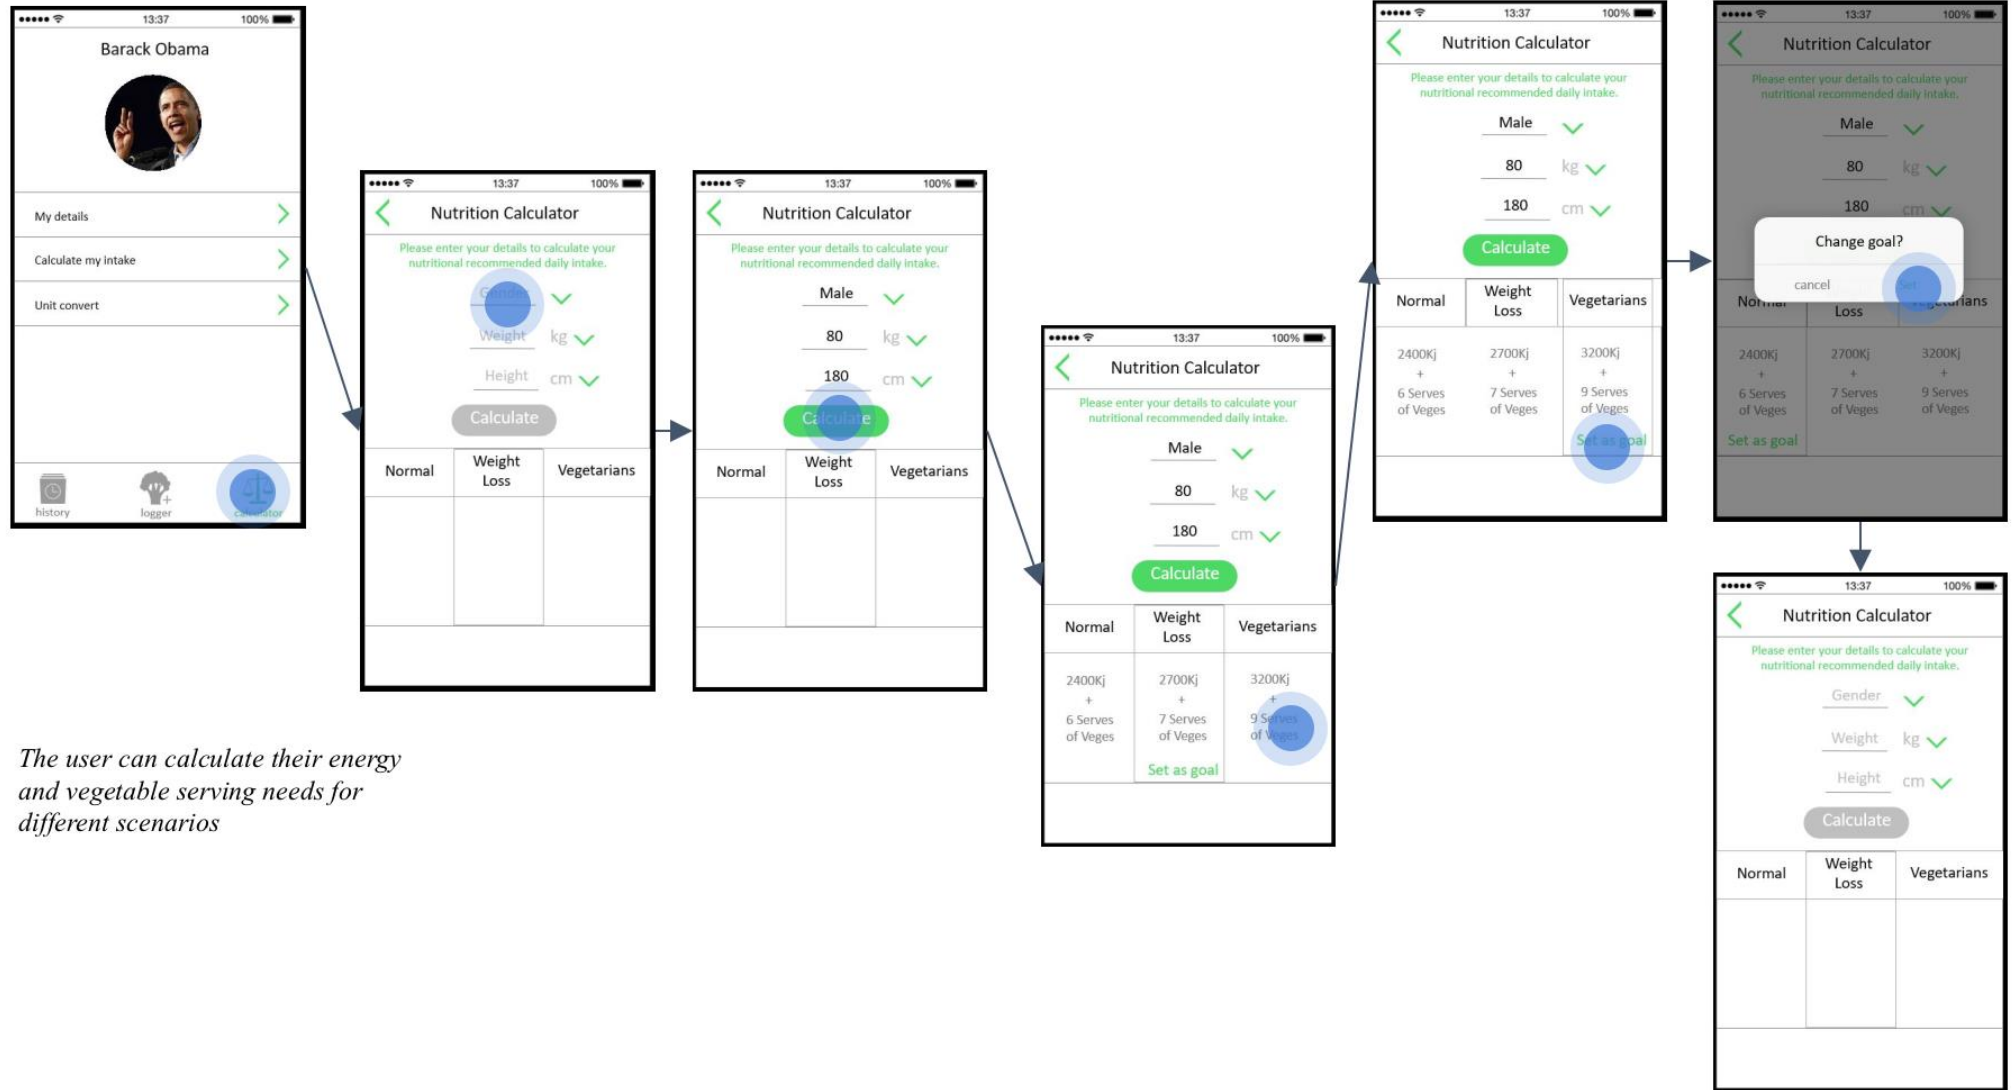

a minimalist but gamified interface for logging vegetables, with support for learning about serving sizes

Minimalist gamified logging in the form of an indicator of progress

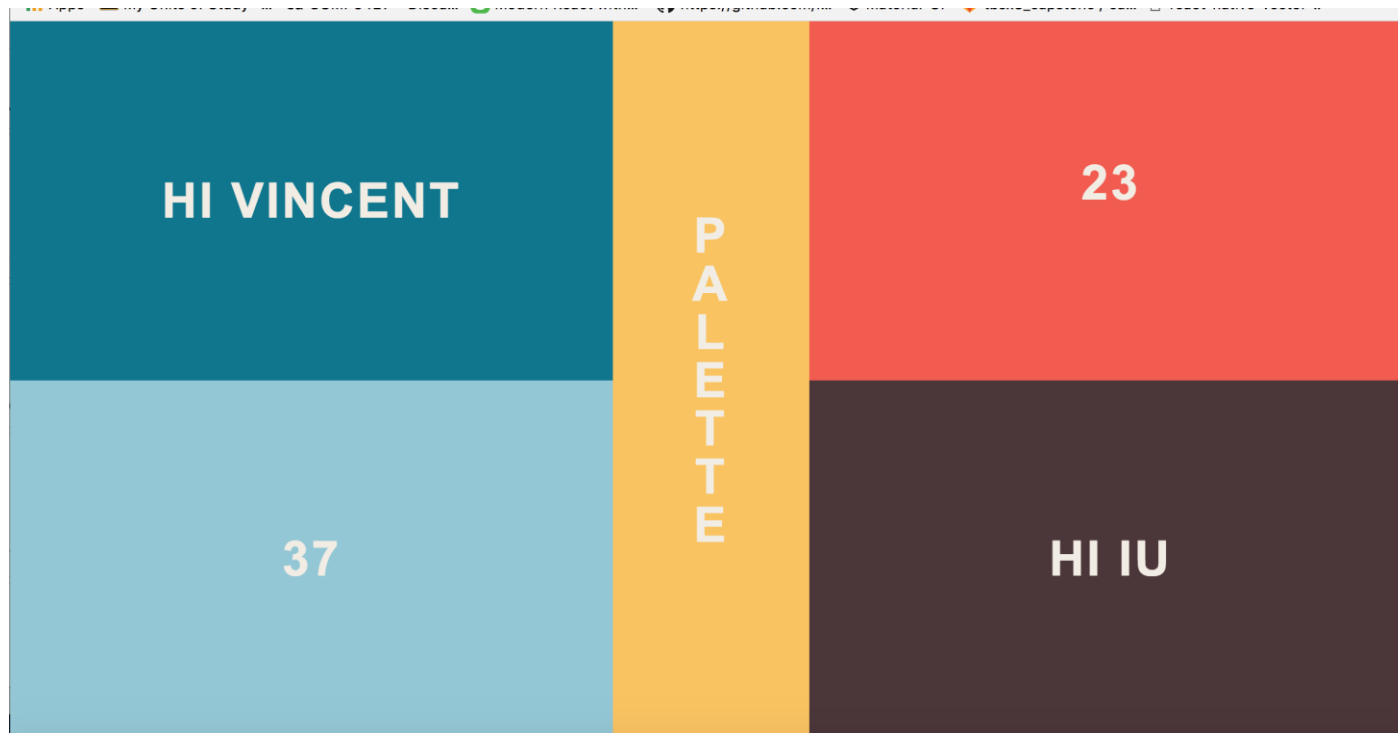

The user can correct accidental logging actions

The user can calculate their energy and vegetable serving needs for different scenarios

A web authoring system based on bootstrap framework within 5 sections that contains all the required multimedia components with considerations of ease-of-navigation and usability.

The production can be considered as a vehicle for propaganda of artists and their works. It aims to enable people to learn more about the arts and experience the connection between paintings and music even in different era.

VINCENT VAN GOGH

Vincent Willem van Gogh (March 30, 1853 to July 29, 1890) was a post-impressionist painter whose work, notable for its beauty, emotion and color, highly influenced 20th-century art. He struggled with mental illness, and remained poor and virtually unknown throughout his life. Van Gogh died in France at age 37 from a self-inflicted gunshot wound.

He completed more than 2,100 works, consisting of 860 oil paintings and more than 1,300 watercolors, drawings and sketches. Several of his paintings now rank among the most expensive in the world.
